Thursday, May 19, 2016, 9:00 a.m.

via videoconference or phone

- Learn best practice tools
- Manage your complex patients with input from experts
- Gain specialized knowledge
- Become an expert in your community

Project ECHO (*Extension for Community Healthcare Outcomes*) is an AAP-sponsored education program developed to help providers manage chronic and complex diseases.

This is accomplished by creating an efficient and effective way for primary care providers to communicate remotely with experts to receive guidance and treatment strategy for specialty diseases.

At Maimonides Medical Center, our focus is on:

Children and Youth with Epilepsy

Contact Ruby Marshall-Reynolds at 718-283-8668, or via email at Reynolds@maimonidesmed.org for information or to participate.
